

## AMPLIFIER REPAIR SERVICES

### WHICH AMPLIFIERS CAN BE REPAIRED?

We can repair most Class A/B and Class D half bridge amplifiers, but repairability is subject to parts availability. Contact our service team with the make, model, and issue for your amplifier to see if we can offer repair service for your amplifier.

### HOW LONG DOES THE AMPLIFIER REPAIR SERVICE TAKE?

Repair times vary depending on parts availability and service demand, but generally expect up to 2 weeks to repair.

### HOW MUCH DOES AMPLIFIER REPAIR SERVICE COST?

Depending on the amp and type of damage that needs to be repaired, repairs can range from \$75 (the non-refundable bench fee) to \$700, but are generally around \$150-\$250. This includes return shipping.

### IS THERE A WARRANTY?

There is a 30 day warranty on repairs made. Failures after the repair service, not directly related to the repairs made, will not be covered under warranty. All amplifiers are fully QC tested, twice, before being returned to their owner.

### HOW DO I SEND IT IN?

Submit an RMA (Return Service Authorization) request at [amprepair.resonance.inc](http://amprepair.resonance.inc). Our service techs will review your request and either send you an RMA or contact you with further questions.

Scan with phone camera to visit RMA page.
